Lancaster Farming

VOL. 7 NO. 36 Lancaster Farming, Saturday, August 4, 1962 $2 Per Year

RESERVE CHAMPION AND GRAND CHAMPION in the Guernsey division of the Southeastern Pennsylvania Artificial Breeding Cooperative show on Tuesday were both from Lancaster County. Kenneth Garber, Willow Street R2, is at the halter of his senior calf which was named junior and reserve champion of the show. Raymond Witmer, Willow Street R1, exhibits his aged cow, named senior and grand champion of the show for the third consecutive year. L. F. Photo

Full Week Of Dairy Shows Bring Few Wins To County

Lancaster County dairymen, with the exception of Guernsey breeders found the going pretty rough in the 11th annual Southeastern Pennsylvania Artificial Breeding Cooperative show this week

County dairymen took both the purple rosettes in the Guernsey judging but the junior championship in Ayrshires was the only other championship to come to the Garden Spot

Raymond and Louise Witmer's "excellent' Penn-Del King's Polly Anna took her third consecutive senior and grand championship banner in the show while another daughter of Golden Harvest King Cole, a senior calf owned by Kenneth Garber was junior champion and runner up to the aged cow

Witmer on his Willow Street R1 farm developed and sold "King Cole' to the cooperative Garber farms at Willow Street R2.

Carl Baldwin, Masonic Home, Elizabethtown R1, showed his senior calf to the junior championship of that breed, but was nosed out in final competition by the aged cow of John Stick, Lebanon R4. Marilyn Harnish exhibited an aged cow which finished a close second to Stick's cow and went on to take the grand championship in the county 4-H roundup.

George and Mary Seeds of Downington took top honors in the Jersey competition with their aged cow Junior champion and runnerup was the senior yearling of John E. Lauer Dover R4

Brown Swiss competition brought out the best of York County when D D Stauffer, Spring Grove R3 showed an aged cow to the top spot over the junior champion, a junior calf, exhibited by Wilson Glat-

(Continued on Page 6)

Drought Brings Comments From All Around County

As Mark Twain said, everyone this week was talking about the weather

At the Lancaster County Soil Conservation Field Day Wednesday, Earl Linton, an associate director in the district from Kirkwood R1 said, "We have been complaining about the dry weather at home, but if I had corn like that (he pointed to the field before him on the Lititz R2 farm) I would certainly be sick, but I guess that wouldn't help things any"

Taking time out from duties at the Southeastern Pennsylvania Artificial Breeding Cooperative dairy show Henry Kettering, Lititz R2 said, "People say you will burn crops up with too much fertilizer in a dry year, but that is not so We had one rented field that didn't get as much fertilizer as some of the rest and that is our worst crop Where we fertilized heaviest, the corn is in pretty good shape — not a good crop, but better than some places"

A farmer from the Mount Joy area (who wishes to remain anonomous) said at the SPABC dairy show, "We know the rain falls on the just and the unjust alike, but not always at the same time. Maybe we just have to wait our turn"

And so it goes across the county as the drought grips the northern section ever tighter.

Feeling among farmers this week indicate that many of them have decided to put large portions of their corn crop in silos Many of the fields have passed the critical stage, and farmers believe much of the crop will not form ears even with sufficient moisture from now till harvest time

Tobacco growers remain cautiously hopeful Some of the crops have not developed

Aug. 15 -17 - First National Grasslands Field Day at Hershey Estates.

Cloister FFA Wins Judging At Ayrshire Day

A team of Future Farmers from the Cloister Chapter at Ephrata High School took one of the $25 awards in the cattle judging contest last Saturday at the Pennsylvania Ayrshire Field Day.

The three-man team from the Lancaster County school had high score in judging junior heifer on the farm of Ellis Mentzer, New Holland R2

A 4-H team from Montgomery county took top spot in judging three-year-old cows, and tied for first place in the aged cow class Their fine showing put them in first place in all around judging for which they received an additional $25

Splitting the $25 award for first place tie in the three-year-old class was York County 4-H which also went on to win second place in all-around judging for an additional $20 award Third place in the contest was taken by a 4-H team from Northumberland County

The cash prizes were made available by the County Ayrshire breeders association, D E Horn and company of York Wayne feeds and New Holland Machine Copany

The Ephrata team included Ronald Kline, Denver R2, Martin Wenrich, Denver R2,

(Continued on Page 10)

Swine Breeders Hold Field Day

Ira H Donbach Manheim R2 a breeder of purebred Yorkshires won a registered Spotted gilt last Saturday at the annual field day picnic of the Lancaster County Swine Producers Association

Dombach scored a 376 out of a possible 400 to win the gilt offered by the host C Warren Leininger Denver R2

The type contest was a highlight of the association's annual picnic and field day attended by 125 breeders

Other judging places

Men's division — second, John Witters third John Eby

LANCASTER POULTRY CENTER

Broilers Off Quarter Cent

Broiler prices slipped slightly more than a quarter cent during the week at the Lancaster Poultry Center. Prices at the August 2 auction ranged 16.6 to 17.5 for a sale average of 16.83 compared to the average of 17.18 last week.

A total of 85,475 broilers in 19 lots were sold while only lot of 6,800 White Vantress at 8 weeks 2 days remained unsold at the bid of 16.0.

One lot of 600 heavy fowl brought 17.2 while 5,700 head of leghorn fowl in five lots brought 9.3 to 9.6. Two lots containing 2,500 pullets sold at 23.6 and 25 6, and three lots containing 2,000 roasters changed hands at 23.6 to 23.8.

The complete sale offered 103,350 head in 32 lots and sold 96,400 head in 30 lots. The only other lot not selling contained 150 White Mountains at 12 weeks six days and bid to 20 0.

Following is the complete report with lot number, seller, grower in parenthesis, age in weeks and days, buyer and price.

Code: WV-White Vantress; WMts.-White Mountains; IR-Indian Rivers; P-Pullett; C-Cockerels; H F-Heavy Fowl; LF-Leghorn Fowl, X Cross; SR-Silver Rock.

● Delmarva

Prices Down Fractionally

Live broiler prices declined slightly in Delmarva during the 24 hour period ending 10 30 Friday morning A barely fair demand met the light offerings.

Ready to cook activity was mostly for heavy birds for feature sales. Estimated slaughter by eastern shore processors for the week end was 828,000 head compared to the 708,300 head last week end.

Prices of 15.9 to 16 7 in farms for 849,900 head were reported during the period.

The Delmarva broiler-feed ratio for the week ending July 27 was up one point from the previous week at 3 5. Broilers averaged 16 71 and mash cost the grower $94 34 per ton.

From Where We Stand . . .

Bumper Crops Are On The Way

"Ask any farmer in this area how his crops are doing and you will hear a joyful answer from most of them: 'The best ever!'

"Observation will bear this out as one travels along the roads and highways in the county and sees the wonderful green of the crops, the height of the corn and beans, and the bountiful second growth of clover.

"The corn is promising to be a bumper crop this year Most of corn seen was fence-top high by the fourth of July The corn is thick also and the rows have been observed to be very clean of weeds, again the result of good weather"

No! the editor has not taken leave of all his senses The above is just a few paragraphs copied from the July 24 issue of the Eastern Indiana Farmer.

A crop forecast in the same paper predicts a bumper crop of corn, soybeans, hay, grain and tobacco throughout the state Only cutbacks in acreage will prevent almost all the crops in Indiana from producting the highest yields on record.

And all this points up the argument we have fostered for a long time — It is not so much a problem of production as it is a problem of distribution

A friends, recently returned from Wisconsin, told of dairymen in that state who let some of their alfalfa crop lie in the field this year because they had no storage space. We know some local dairymen who practically drool at the thoughts of all that hay going to waste while they wonder if they can scrape enough together to get herds through the winter.

Well, there ought to be a moral here somewhere if we can find it!

Maybe it is best summed up by a farmers from north of Lititz who said a week or so ago, "We had three good years in a row, and maybe we got spoiled."

Perhaps the best thing to do is raise the old battle cry of the Dodgers when they used to lose ball games in Brooklyn. "Just wait till next year"

At least that's how it looks from where we stand

★ ★ ★ ★

No ONE Way!

Two dairymen — breeders of pure-bred cattle — last week presented their theories on the best methods of improving the dairy herd.

We believe it reiterates the idea that there is no one way to do a thing in the business of farming

Raymond Witmer, an exteremely successful breeder of Guernseys at Willow Street R1, told members of the county Guernsey Association meeting at his farm for a practice judging session, the job of the breeder is to select bulls which will overcome some of the faults of the cow. He explained that a bull with the ability to transmit strength to his calves should be mated to the over refined cows and the bulls with extereme quality should be mated to the rugged cows.

Donald Seipt, a well known breeder of Holstein cattle at Keystone Farm near Easton, Penna , said at the county Holstein field day, the temptation is great for dairymen to use too many bulls and thus introduce too many different genes into the herd. He said this is possible because service to almost any bull in the United States and Canada is available through artificial insemination.

Now anyone who can see the results of these two theories put into practice must know that they are both successful practices for these two men, but it is rather hard to reconsile the two ideas

We repeat, there is seldom one best way to do a thing in this business of farming. If it works better than anything you have tried before — then use it till something better comes along

At least that's how it looks from where we stand.

★ ★ ★ ★

On Reporting

Reporting is a peculiar business. There are those who report for world wide news services, for domestic news services, for individual newspapers, and for magazines which deal primarily with the daily happenings all over the world There are other reporters for radio and for television, for networks, and for individually-owned broadcasting firms

Reporters and reporting occasionally get into trouble. Recently a prominent U.S. Senator blasted reporters generally, and newspaper and magazine reporters specifically for what he said was "pitifully inadequate" coverage of the very complex, highly controversial new farm legislation.

This particular Senator's scattergun blast at reporters followed right on the heels of Secretary of Agriculture Freeman's tribute to the press. Mr. Freeman termed the same reporting job "excellent reporting."

So, you pays your money and you takes your choice

The Enterprise-Courier, Charleston, Mo.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material: 2 Kings 24 through 25, Jeremiah 40 1-6, 42 1-6
Devotional Reading: Psalm 137:1-6

The Crash

Lesson for August 5, 1962

THEY cried when Queen Nehushta left town. For the queen-mother did not leave of her own accord; she was a captive And as we know, the only people left behind to weep were the "poorest of the Land." No one capable of dreaming-up a revolution was left behind, Nebuchadnezzar thought. For along with the queen mother went her puppet son Jehoiachin (or Jeconiah as he was sometimes called). It would really have been a service to the country if Nebuchadnezzar had stopped right there; for neither she (a local girl of no brains, apparently) nor her son (a mere boy whose father had set him a poor example of how to be a king) was any credit to the country. But with all the young men of the army gone into exile too, and all the skilled workers, and all the governing class and all the people with any property, — there was enough to cry about.

Dr. Foreman

Worse to Come

It was hard to see how things could be worse. But there was worse to come King Jehoiachin's successor was appointed by the King of Babylon, and incidentally his name was changed too—perhaps to demonstrate that he was the last, weakest, and most stupid of Josiah's sons. He did not know on which side, so to speak, his bread was buttered. He paid too little attention to Jeremiah's warnings He somehow persuaded himself that (with the help of Egypt?) he could break away from Babylon. This time Nebuchadnezzar made a complete shambles of the city. All previous invaders had spared the temple, though they had robbed its treasures. Zedekiah may have thought that since the temple of God was still in the city, God would not let it be destroyed. If he thought so, he was terribly mistaken; for the temple was burned to the ground, the great and beautiful temple which had stood there for about 300 years. With it were burned not only the royal palaces but all the "great houses" of the city.

Could It Happen Here?

When a nation goes to war it usually thinks of itself as winning. Spain thought of course she could crush England with the famous Armada; instead, the loss of the Armada marked the long down-hill road of once proud Spain. England fully expected to win the war of the American "rebellion." The Confederate States of America were confident that they could force the United States to recognize their independence. The Kaiser, and after that Hitler, thought "Deutschland uber Alles" —Germany Above All—could be arranged by a snappy Blitzkrieg. It is a sad experience to stand in a modern city that once was as bustling and proud as our New York, and see the war-shattered wrecks of the tall beautiful buildings laid brutally open to the sky. It is a bit of a shock to hear in a great Japanese city that fires started by American bombings laid waste more than 90% of the city that used to be. Now we live in a time when the two most powerful nations on earth possess weapons beside which the bomb that fell on Hiroshima was hardly more than a large firecracker. We live in a time when all it takes to demolish one city is one shot. Our cities, and Russian cities, are not even as hard to destroy as Zedekiah's Jerusalem was. It took the best army in the world two years to smash Jerusalem; but the next "war" can be over in two hours. There are no victors in an atomic war, only victims.

What Israel Learned

There was one precious thing not destroyed or deported in the crash of Jerusalem: it was a lesson. They learned, the hard way, that God plays no favorites. He is merciful and long-suffering and very patient; but if people do not really love the ways of peace, eventually they pay, in bloody death, for their folly. This is just as true for great nations as for little ones It is just as true for church-going nations as for nations without churches. If the great nations of the world would put as much money and genius into keeping peace as to making war, men could breathe again.

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Feed Hay Carefully

Most dairy and livestock producers have been forced to feed hay or silage during the past month, in many cases the hay is thrown upon the ground for the cattle and much of it is tramped and wasted This is not the proper way to feed hay in the first place because of danger of worm infestation and secondly, it is wasting part of a very valuable feed Hay should be fed from a rack or manger Plans are available

To Plan For Silage Storage

It appears that dry weather may result in many fields of corn being made into corn silage rather than husking corn. With small fodder and a poorly developed ear of corn it is recommended that the crop be made into silage in order to utilize the maximum amount of feeding value This kind of corn may not make excellent corn silage but it is the best way to get the most from it Trench silos or bunker silos provide good, economical storage Plans are available.

To Treat Small Grain Seed

The proper cleaning and treating of homegrown seed is very important to have a good crop next summer Grains should be treated with a fungicide such as Ceresan M in order to check diseases. If the crop should any evidence of disease this past season, then the purchase of certified seed is strongly recommended.

To Apply Tobacco Sprays Carefully

Tobacco growers who are planning to spray their crop to stop sucker growth should become well informed on the proper time and amount of the spray to be used. Many instances of poor results have been blamed on using too much of the material and by spraying when the crop is too im-mature. Information is available.

Quarryville Man Is Young Farmer State President

A Lancaster County farmer was named president of the Pennsylvania Young Farmers Association in a special election last Saturday.

Alfred R Overly, formerly a regional vice president, will fill the unexpired term of James Bristline, Landisburg R2, who has resigned to take a position with the Soil Conservation Service.

The 32 year-old Holstein dairyman of Quarryville R2 was named to the post during a meeting of the Young Farmers' Executive Board meeting at Wyalusing Rocks, Bradford County.

Overly, the Outstanding Regional Young Farmer of 1961, is serving ths third consecutive term as president of the Lampeter Young Farmers Chapter.

James Lefever, a Guernsey Dairyman from Quarryville R3, will succeed Overly in the post of vice president Lefever is a member of the Solanco Young Farmers Association

Five YFA members from Lancaster, including Vincent Becker, Lititz R3, state secretary attended the state meeting

● Drought

(Continued from Page 1)

far enough to be permanently damaged by the drought but some of the crops are out in full blossom far short of normal size In central and southern areas of the county, tobacco continues to make satisfactory growth in spite of the dry soil

Pastures, completely unproductive for several weeks now in most of the county are still producing some feed in spotty areas in the southern area

Dairymen in particular are casting about for substitute forage for winter feeding and many are planning some temporary pasture program to try to stretch short hay supplies as far as possible However, without rain soon temporary pastures will have very little value this fall.

Conservationist Begins Duties In Co. Office

Richard A Shipman, a native of the Sunbury area has begun work with the local work unit of the Soil Conservation Service, W Martin Muth, Work Unit Conservationist said this week

Shipman began his duties as a conservation aid last Monday in the Lancaster office where he will assist Muth and Abner Houseknecht, soil Conservationist in establishing conservation practices on county farms.

Shipman graduated from the Sunbury Area Joint High School in 1961 in the vocational agriculture curriculum. He was born and raised on a farm where his father and grandfather were cooperators with the Northumberland County Soil Conservation District.

Co-Op Honors Retiring Man

Edwin Witmer, Quarryville was honored at a banquet upon his retirement after 13 years as a field serviceman for Eastern States Farmers Exchange, Inc.

Approximately 50 employees and associates of the cooperative heard a taped message from the general manager of Eastern States in Springfield, Mass

Witmer received a plaque and a wrist watch Mrs Witmer was presented a bouquet of Red Roses

Paul Howard, Manager of the local branch stated that the services of Mr Witmer would be greatly missed by all those connected with the cooperative

Fungi are plants but have no green coloring matter and therefore cannot manufacture their own food

BERRY BONANZA

By Mrs. Richard C. Spence

By: Mrs. Richard C. Spence

Fresh berries, plentiful during the summer months inspire colorful, easy hot weather desserts to serve with your favorite cookies Being able to freeze these fruits at the peak of their deliciousness now makes them available all year round for mouthwatering desserts Frozen fruit may be substituted in these recipes for the fresh fruit if it is now available

The queen of summer desserts is a beautiful parfait, contrasting juicy fresh raspberries with sugar wafers and cool white lemon sherbert.

RASPBERRY PARFAIT

1 pint fresh raspberries
1 6-½-ounce package sugar wafers, crushed (about 1 cup crumbs)
1 pint lemon sherbert

Crush raspberries, saving a few for garnish. (Add a little sugar to taste, if berries are tart) Layer crushed berries with sugar wafer crumbs and lemon sherbert in four parfait glasses. Freeze.

* * *

Blackberry Ripple, a creamy delight, looks fancy but it's really easy to prepare It combines fresh blackberries and ice cream

1 pint blackberries
1 quart vanilla ice cream softened
softened
1 quart strawberry ice cream softened

Sweeten blackberries to taste. Mash and press through sieve Makes about 1-½ cups Layer ice cream and ½ cup of puree in a 2-quart mold Freeze. Unmold on serving plate. Garnish with whipped cream is desired Use remaining puree as a sauce

* * *

BERRY PARFAIT

Fold 1 cup of your favorite berries, (raspberries, blueberries, strawberries) partially crushed and sweetened to taste, into 1 pint vanilla ice cream or 1 cup heavy cream, whipped. Alternate layers with your favorite cookie crumbs Freeze until 10 minutes before serving.

* * *

BLUEBERRY CHEESE PIE

CRUST:
1-⅔ cups graham cracker crumbs
¼ cup softened butter or margarine
¼ cup brown sugar
½ teaspoon cinnamon

Thoroughly blend above ingredients. Pour into a 9-inch pie plate Press crumbs firmly against bottom and sides of pie plate (the easy way is to press crumbs into place using an 8-inch pie plate). Bake in a moderate oven (375 degrees) 8 minutes. Cool and fill.

FILLING

1 envelope unflavored gelatine
½ cup sugar
¼ teaspoon salt
3 eggs
1 cup milk
1 8-ounce package softened cream cheese
1 teaspoon vanilla

Combine gelatine, sugar and salt in top of double boiler. Beat eggs with milk. Stir into dry ingredients. Place over boiling water and cook until mixture begins to thicken, about 15 minutes. Slowly add 1 8-ounce package softened cream cheese and 1 teaspoon vanilla extract. Cool. Pour into cooled pie shell. Chill until firm.

TOPPING:

1 cup heavy cream
½ cup confectioners' sugar
½ cup commercial sour cream
1 teaspoon vanilla
1 cup fresh blueberries

Whip cream with confectioners' sugar until mixture will hold stiff peaks. Continue beating while gradually adding ½ cup commercial sour cream and vanilla. Stir in 1 cup fresh blueberries Spread over cheese filling. Makes 6 to 8 servings.

* * *

BLUEBERRY PANCAKES

1 cup milk
1 egg
1 tablespoon melted or liquid shortening
1 cup pancake mix
½ cup fresh, frozen or canned blueberries, drained

Place milk, egg and shortening in a shaker or glass jar. (If melted shortening is used, add after pancake mix.) Add pancake mix, shake vigorously 10 times or until batter is fairly smooth. Pour batter onto a hot, lightly greased griddle Sprinkle each pancake with berries before turning Turn and bake on other side Serve with butter and warm syrup. Makes 7 to 8 pancakes.

* * *

Blueberry Crepes rate high for their make-ahead simplicity and their compliment-catching filling. Light and tender pancakes are filled with a generous serving of sweetened whipped cream and blueberries, then rolled and served immediately or frozen 'til dinner or party time.

BLUEBERRY CREPES

CREPES:
3 eggs, beaten
¾ cup milk
¾ cup pancake mix
½ teaspoon lemon extract

Combine beaten eggs and milk. Add pancake mix and lemon extract stirring until smooth. Place about a teaspoonful of butter in a small frying pan and heat until butter bubbles. Pour in enough batter to coat bottom of pan with a thin layer. Bake until delicately browned on under side, turn and bake on other side Cool.

FILLING

1 cup whipping cream, whipped
2 tablespoons vanilla
½ teaspoon vanilla
1 cup fresh, canned or frozen blueberries, drained well

Combine whipped cream, sugar and vanilla; then add

drained blueberries. Place about ⅓ cup blueberry filling on edge of each pancake. Roll up jelly-roll fashion. Wrap in foil and freeze in freezer or freezing compartment of refrigerator. Let thaw about 15 minutes before serving (If you do not have freezing facilities,, pancakes may be made, filled and served immediately.) Makes 6 servings.

* * *

STRAWBERRY HONEYS

2 tablespoons butter or margarine
1 8-ounce jar marshmallow creme
1 teaspoon vanilla extract
1 or 2 drops red food coloring
4 cups sugar coated rice cereal
1 4-ounce package coconut cream pudding mix
2 cups milk
1 pint fresh strawberries, sliced

Melt butter or margarine in top of double boiler. Add marshmallow cream and vanilla extract. Stir until smooth. Add food coloring. Stir until blended. Stir in rice cereal and mix until evenly coated. Remove from heat but keep over hot water. Moisten hands with cold water for easy handeling. Shape into 9 tart shells greased muffin pans using about ½ cup mixture for each shell Chill. Prepare pudding mix according to package directions. Chill. Just before serving, remove tart shells from muffin pans. Fill with chilled pudding. Top with sliced strawberries. Serve at once. Makes 9 servings.

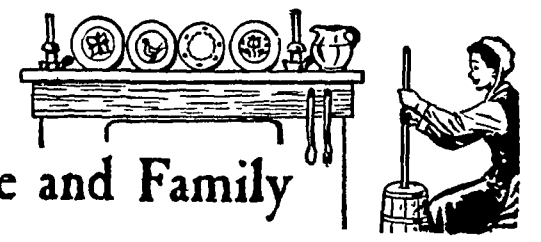
* * *

STRAWBERRY CREAM

1 10-ounce package sliced frozen strawberries
1 pint sour cream
¼ cup sugar

Slightly thaw frozen strawberries. Stir into sour cream along with sugar. Spoon into sherbert glasses or small snifter and freeze. Garnish with whipped cream and sliced strawberries. Makes 4 servings.

For the Farm Wife and Family



Ladies, Have You Heard? . . .

By Jane Thurston

To Teach A Child To Dress

Zippers that slide easily are a big help Fasten a large decorative pull on zipper to make it easier for child to pull it up or down

Flat smooth buttons at least the size of a nickel will slip in and out of buttonholes easily Sew all buttons on with an extra long shank so child can grasp them easily

If you use grippers, get the large ones, about the size of a dime See how tightly they fit together If your child doesn't have too much strength in his fingers, don't use grippers

Pressure tape is another easy-to-use fastener . . . you can use it to replace any other fastener.

THURSTON

For Mustard Stain

For mustard stain in a washable fabric, rub detergent (liquid) into the stain, then rinse If the stain isn't removed, try soaking the fabric in a hot detergent solution several hours or overnight if necessary It stain remains, use a bleach, such as sodium perborate, if it is safe for the fabric.

SLEEK, STRONG-BONED

on New FORMula Wayne Calf Starter

Here's an ideal creep feed! New FORM—new FORMULA! Special new texture and formulation gets calves on dry feed early. Fortified with an antibiotic, vitamins, minerals and proteins, new FORMula Wayne Calf Starter grows sleek, bright-eyed, strong-boned calves.

New FORMula Wayne Calf Starter

- Coarse, Uniform Texture Calves Like
- 10.6% Faster Gain — 14% Less Feed*
- No Growth Lag After Weaning
- Antibiotic Fortification Helps Prevent Scours
- Tastier — Gets Calves On Dry Feed Earlier

*In Research Farm tests compared to previous feeds.

THE FUTURE FARMERS JUDGING TEAM from the Cloister Chapter at Ephrata are, from Left to Right, Ronald Kline, Denver R2; Martin Wenrich, Denver R2, and Jerry Snader, Ephrata R1. Lewis Ayers, teacher of vocational agriculture at the school is at the halter of the heifer The team won a $25 award for judging heifers at the state Ayrshire Field Day last week on the farm of Ellis Mentzer, New Holland R2. L. F. Photo

● Cloister FFA

(Continued from Page 1)

and Jerry Snader, Ephrata R1 Coach of the team was Lewis Ayers, teacher of vocational agriculture at Ephrata High School

Dr William Kelso, extension dairy specialist at the Pennsylvania State University said, "If we could get rid of some of the low producing cows in our herds, we could eliminate the dairy surplus"

He said 31 cows producing an average of 12,000 pounds of milk will make the same return for labor as 140 cows producing at the rate of 7 000 pounds, but those 31 cows will put only 38 per cent as much milk on the market

Kelso said he believes we are going to have to start thinking in terms of the total amount of nutrients we feed cows rather than the pounds of feed

In urging dairymen to follow a "lead-feeding" program, Kelso said, 100 pounds of body fat will produce 880 pounds of milk, but the cost must be fed ahead of her production to help her maintain her production up to her potential

A fireman's organization, conducting a ticket selling campaign for the annual dance, featured this slogan "You come to our dance and we'll come to your fire"

The first known use of the word "capital" meaning seat of government since Roman days was applied to the state house built at Williamsburg, Va 1698.

MH-30 halts tobacco suckers —increases yield up to 20%

Sprayed correctly at full-flower stage, MH-30 prevents sucker growth to produce higher quality tobacco And because remarkable MH-30 retards sucker growth chemically, it cuts the cost and labor of hand suckering tobacco.

More and more growers are producing higher yields of quality tobacco, some as high as 20%, as they eliminate back-breaking hand labor with MH-30 and increase profits. Isn't it time you tried it? For full information, see your local supplier or write: Dept. 7163 - MHT, Elm Street, Naugatuck, Connecticut.

How Penna. Dairymen are

...Supplementing Short Pasture

...Stretching Their Hay Supply

There's a new low-cost way to keep those cows in milk and in condition right through the rest of the summer and fall. You do it by top-feeding Purina Bulky Las . . . just a gallon or two per feeding . . . along with your regular milking ration. Purina Bulky Las delivers the added nutrition cows normally get from roughage. Use it to stretch pasture or hay. It's loaded with minerals and energy. One ton of Bulky Las saves up to 3 tons of average hay. Now with hay prices what they are today, Purina Bulky Las is a real good investment. AND SAY, for a limited time only, you can buy Purina Bulky Las at a handsome savings over the regular price. This makes it an even BETTER bargain than ever before. See or phone us today. Keep your cows producing, even if pasture is brown and dry. Stretch your hay supply. You can do it with Purina Bulky Las . . . in the Checkerboard Bag.

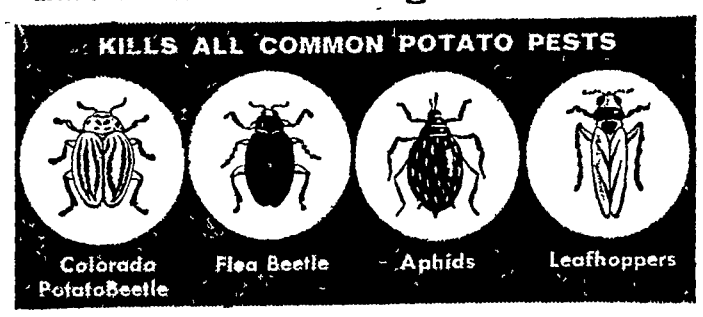
Potato Growers You Need

MILLER

Thiodan®

The new broad range insecticide



With this important new chemical discovery—Thiodan—you get a multiple kill of several potato pests at the same time. This means *one shot* control which, of course, is a more economical way to protect your crop.

Thiodan is a concentrate. Just mix with water and apply with ground or air spray equipment. And Thiodan is compatible with all commonly used fungicides. Its effectiveness has been proved over several seasons.

Conservation Field Day Held

The Weather played one of the most important roles for the second year in a row at the second annual Field Day of the Lancaster County Soil Conservation District

Drought conditions on Wednesday made several planned demonstrations virtually impossible, but the tours to conservation practices on Speedwell Forge went off as planned During the scheduled day last year, rain fell during most of the day forcing cancellation of practically all the scheduled events.

In Wednesday's tour, wagons loaded with approximately 100 visitors to the Lititz R2 farm stopped at the site of tile drainage fields, diversion terraces, woodland border cuttings and plantings, strip cropping and tree nurseries while members of the soil conservation service explained the value of conservation on the land.

John Kitch, service forester, in a woodland plot with many trees and shrubs marked for identification told farmers what help they could receive from the Forest Service, while the game commission, through a demonstration planting and sample border cutting told farmers of the value of wildlife in the conservation program

Fourteen agencies cooperated with the soil conservation district in sponsoring the field day.

Farm Societies Plan County Convention

County Convention plans were made by the executive board of the Society of Farm Women of Lancaster County at a recent meeting in the home of Mrs. Lewis Bixler, Marietta R1.

The convention will be held Saturday, November 3, in the Pequea Valley High School.

Farm Women Society members will also assist three picnics for migrant workers in the county.

Mrs Kenneth Eshelman, county president was in charge of the meeting. Mrs. Andrew Nissley led devotions.

Dairymen

Some Points To Consider About Roughage Extenders. A Critical Situation Exists!

Many ask us, "HOW can we extend our hay and silage and not jeopardize our milk production this fall and winter?"

What about citrus pulp for instance,
"IS IT CHEAPER?" SURE IT IS.

NUTRO-SWEET is not the only answer to shortage of roughage. Other feeds such as citrus pulp definitely have a place.

However, consider these facts:

Although cheaper than NUTRO-SWEET and a good source of energy, CITRUS PULP contains only 6½% protein, little phosphorus and no vitamin A.

Introduce Citrus Pulp GRADUALLY with the dairy ration as it lacks palatability and is LAXATIVE when fed in excess. Cows must become accustomed to it.

When available CITRUS PULP can be used safely to the extent of 25% of the herd's dry roughage requirements to replace energy normally found in good roughage, and our

Green Pastures NUTRO-SWEET

will replace the more critical values found in good pasture such as Protein, Vitamin A and Phosphorus.

Do not feed citrus pulp straight but mix with silage – green chop or

NUTRO-SWEET

1 part of citrus pulp (dry weight) to 3 parts of NUTRO-SWEET, silage or green chop.

This type of program will:

1. SAVE MONEY AND REPLACE
   the Vitamins, Minerals and Energy lacki ng in low quality roughage.
2. PREVENT BREEDING TROUBLE and Calving problems and
3. INSURE NORMAL PRODUCTION instead of underproduction LATER.

A high milk production level demands a good program. For a program to maintain health and prevent nutrition problems and milk depletion (early drying off), of your cows, contact any Miller & Bushong Service Representative for an appointment with our Dairy Specialist or call us direct at Lancaster 392-2145.
